

When Fire Threatens  
and Seconds Count,  
Take Control

## Oil & Gas Industry

Essential protection for Isolated locations.

A higher level of safety. FireCaddy® fire suppression systems safeguard people, equipment, buildings and the environment – long before outside help can arrive.

Fast action. Long run times.

FireCaddy® units are mobile, have integral fire foam suppressant and will function effectively with either a self-contained water supply or with almost any readily available water source. Workers in the field can quickly react and safely respond to most fire hazards in seconds, not minutes. Traditional dry chemical or CO<sub>2</sub> extinguishers can only deliver suppressant for a few seconds. FireCaddy® offers the safety of extended run times, measured in minutes, not seconds.

FireCaddy® systems reduce the risk of loss while exceeding the requirements of regulatory compliance.

A bigger margin of safety and reduced risk.

Fight fires from a safer distance. A FireCaddy® can extend your distance from the water source using up to 400 feet of hose and will propel water/foam suppressant up to 60 feet from the nozzle. With two separate outlets, the firefighting attack can occur simultaneously from two different positions.

Reduced water damage.

The FireCaddy® systems reduce potential water damage to structures and equipment by significantly reducing the amount of water normally required to extinguish a fire.

Reduced environmental damage.

Our FlameOut® foam suppressant can help you in more than one way. FlameOut® is recognized as an environmentally approved fire fighting agent so it can be used worry free. The foam acts to isolate and breakdown hydrocarbon molecules making it easier for natural microbes to begin to consume these molecules. This can help reduce your clean-up and spill remediation costs.

Highly mobile, fast response

Multiple class fire coverage

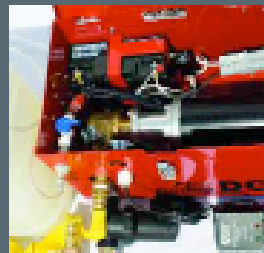

Easy operation from safer distances

Exceeds firefighting regulations

All season protection

FireCaddy® GH5501

DC1206 – 12V Battery

FireCaddy® Truck Mount

Simple Operation
